

Customer (module)

The customer module is the only one which you won't see opened on the left hand side when you start AMPAREX. This is because the module is always bound to one particular customer session. However there might be more than one customer session open at the same time. Also, multiple users can work simultaneously within one customer session.

The customer module can be divided into the following sections:

- [Typical workflow examples](#)

-
- [Documentation](#)
 - [Downloads](#)
 - [Release notes \(overview\)](#)
 - [Imprint](#)
 - [Privacy Policy](#)
 - [AMPAREX API](#)
